PANZER GENERAL[®] II

More than a sequel, PANZER GENERAL[®] II is an entire generation beyond anything yet seen in strategy games. You'll marvel at the enhanced game play of the second generation PANZER GENERAL game engine! Battles rage through WWII's Eastern and Western Fronts, North Africa, even the continental USA! And with full multiplayer support, the battles can include up to four players.

Setting a new standard for strategy game artwork, PANZER GENERAL II features the heightened realism of hand-rendered maps — thirty beautifully rendered battlefields that are faithful to the real ones of WWII. Plus painstakingly detailed 3D-rendered combat units with six facings. We call this the *LIVING BATTLEFIELD*[™], and it's why PANZER GENERAL II is the new face of strategy gaming.
